## HYBRID MELON

### CRETE No.1

#### COMPACT GROWER

- Defined uniform suture-less netting, deep salmon-red flesh tight cavity.
- Compact grower, short inter nodes, round fruit, weight of 1,600g.
- High quality sweet tasting, brix of 15%.
- Good heat tolerance, tolerance to Fusarium Wilt.

### BALT

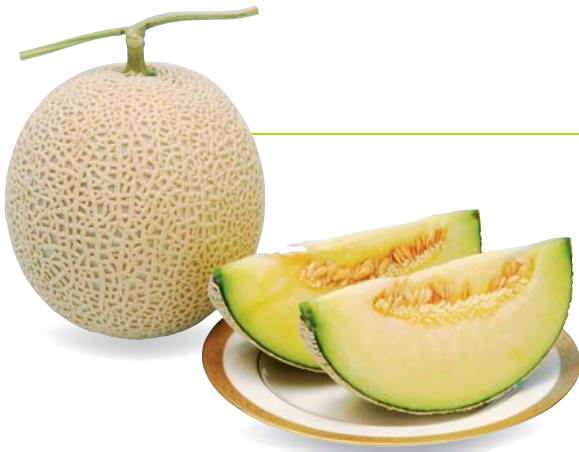

#### EASY CULTIVOR

- Compact plant habit, easy to grow outdoors or under plastic.
- Good internal quality, green sweet juicy flesh, brix of 16%.
- Defined netting, oval shape weight of 1,600g.
- Resistance to Fusarium wilt.

## ATLANTIC

### TENDER FLESH

- Attractive very sweet green flesh, round shape popular Japanese High Class melon.
- Strong uniform netting, recommended trellis cultivation.

## CELEBES

### RICH GREEN FLESH

- Large round fruits, excellent high quality netting.
- Adaptability to wide range cultivation seasons, recommended for trellis.

## SAMAR

### HIGH QUALITY GREEN FLESH

- Large green flesh defined net melon with a compact growing habit, short internodes.
- Excellent resistance to cracking, good tolerance to Fusarium Wilt.

## FLORES

### FAVORABLE TASTE

- High quality, green flesh, large round defined netting fruit, with a compact growing habit.
- Shows good adaptability in high temperature cultivation, tolerance to Fusarium Wilt.

## TASMAN

### GOOD INTERNAL CONTRAST

- Strong deep red flesh, large fine netting round fruits.
- Can be cultivated outdoors on the ground or indoors on trellis.

# HYBRID MELON -WATERMELON

## SIEBOLD 2

### VERY EARLY

- Smooth oval shape, ivory white exterior.
- Potential high yields and good keeping quality.

## GLOVER

### LONG SHELF LIFE

- Early maturing, round uniform oval shape.
- Eye catching tasty green interior.

## SUNNY BALL

### SMALL RUBGY-BALL

- Small oblong shape, excellent fruit bearing, easy to grow in a wide range of cultivation slots.
- High yields, fruit weight of 2.0-3.5kgs, crispy red flesh, thin hard rind, with good long shelf.

## VENUS 2

### LARGE ROUND

- Large round shape, fruit weight of 7.0-8.0kgs.
- Nice deep red flesh, good fruit setting in cooler conditions.

# HYBRID EGGPLANT

## DOLPHIN

### SLENDER FRUIT

- Early maturing, proven well indoors or open field cultivation.
- Oblong slender soft black-purple fruit, weight of 200g, length 25-28cm.
- Vigorous up right growing habit, high yielding.

## PUMA

### HIGH QUALITY

- Recommended as an open field summer to autumn cultivation variety.
- Long cylindrical glossy purple-black fruit, weight of 200g, length 25cm.
- Strong vigorous, half open plant, good tolerance to heat and drought.

## CHEETA

### VERY EARLY

- Highly productive long thick uniform fruits, length of 23-26cm, weight of 180g.
- Black purple soft skin, outdoor variety harvesting from summer-Autumn.

## PEACOCK

### ABUNDANT FRUITS

- Green spineless calyx, oval black fruit length of 15-20cm, weight 200g.
- Thrives in a summer to autumn slot, indoors or open field.

## GIRAFFE (op)

### SLENDER FRUITS

- Glossy purple early maturity long slender soft fruits, length of 35cm, diameter 4-5cm.
- Half open plant habit, for an outdoor cultivation, with summer-autumn harvest.

NAME	CULTIVATION	LENGTH (CM)	CALYX COLOR	SKIN COLOR	BRIX

GIRAFFE(OP)	OUTDOOR	35	PURPLE	PURPLE	LONG-SLENDER

## HYBRID FRUIT CROPS

### SUNRISE -KABOCHA-WINTER SQUASH

- Strong bright yellow flesh, very sweet tasting winter squash.
- Uniform stout black-green fruits, weight of 1.5kgs.
- Recommended fruit setting at 12-13 nodes, harvestable 50-55 days following pollination.

### SUNSHINE -KABOCHA-WINTER SQUASH

- High quality, smooth black-green skin, vivid bright yellow flesh.
- Vigorous plant growing habit, with excellent fruit setting.
- Large uniform oval fruit, weight of 2.0kg.
- Favorable taste, great in boiled / steamed oriental cooking.

### AOBA-Balsam Pear

- Fresh dark green long volumes cylinder fruits, dense roundness tooting, with a high yield potential.
- Fruit length of 30cm, weight of 300g.
- Very healthy high in vitamin C, excellent for summer consumption, tasty in stir-fry with eggs and meats.
- Vigorous plant growth, excellent use for "Green-ECO certain" for shading.

### MOMIJI-Balsam Pear

- Strong plant growth, continuous fruit setting, potential high yielder.
- Glossy dark green fruit color, good roundness tooting.
- Cylinder blocky shoulder, tapered bottom fruit shape, Fruit length of 30cm, weight of 400g.
- Highly nutritious, good tasting used in salad, stir-fry and pickling.

## DAISY-Wax gourd

- Mini size, full maturity at 25 days after pollination.
- Very good yielding, appealing dark green color outer skin.
- Compact fruit weight of 1.5kg, can prolong a harvest for a larger fruit size up to 2.5kg.
- Recommended for a cultivation of 6-8 fruits per plant.
- Strong storage quality.

## BABY'S BREATH-Wax gourd

- Powdery wax type variety, which can be rubbed off showing an attractive vivid green skin color
- Mini compact fruit size of 1.5kg, at full maturity 25 days after pollination
- Very good yielder, good keeping quality
- A prolonged harvest can show fruits up to 2.5kg

## FIREWORKS-Hot pepper

- An extremely hot slender fruit, with downwards fruit growth.
- Vivid up-right large plant habit.
- Long fruit 10cm in length, 1.0cm in diameter.
- Green to bright red color fruits.

## FIREBALL-Hot pepper

- Sweet tasting green to bright red long tender fruits.
- Long slender within a size of 10cm in length and 1.3cm in diameter.
- Growth downwards, with a strong plant.

## FIRECRACKER-Hot pepper

- Small leaves, vigorous plant growth.
- Small size fruits, in a length of 4cm, diameter of 0.6cm growing in an upwards direction.
- Very pungent taste, green turning to a vivid red coloration.

# HYBRID PAK CHOI- CABBAGE

## TAIKO

### VIVID GREEN LEAFS

- High yielding, early variety, with good growing in summer high temperature.
- Semi up-right vivid green color leaves, with a broad thick deep green compact petiole.
- Summer variety, avoid cultivation in winter and spring due to bolting.

## VICTORIA

### ALL YEAR CULTIVATION

- All year sowing variety, very good resistance to bolting in cultivation in low temperatures.
- Broad, thick, deep green petiole.
- Up right habit, green long oval color leaves, taste for use of fresh greens.

## EMERALD

### SOFT TASTING

- Dark green large oblate hybrid, very good burst resistance.
- Early variety, semi flat head, with a very soft taste.

## TURQUOISE

### STRONG SUMMER CULTIVATOR

- Early maturity, shows excellent heat tolerance.
- Strong small leaves vivid green color, with a semi round head.

## STARTING LINE HYBRID WELSH ONION

- Highly recommended summer variety with tolerance to heat stress.
- Attractive deep green long single stem, upright plant habit.
- Uniform - high marketable quality yields.
- Resistance to tip curling even under heat and rainy cropping conditions.

## STARTING GATE HYBRID WELSH ONION

- Slender dark green round leaf color, recommended for a summer cultivation.
